COMPUTER ENGINEERING DEPARTMENT

Vision

Create a sustainable academic environment to produce highly competent computer professionals of the future

Mission

- M1.** To expose students to latest tools and technologies in computing.
- M2.** To foster the professional development of students by providing excellence in education.
- M3.** To Adapt rapid advancements in computing by engaging students in the lifelong learning.
- M4.** To inculcate sound ethical, moral and social values amongst students for benefit of the society.

Program Educational Objectives

The program educational objectives (PEOs) are to produce Computer professionals.

- PEO1.** Identify, design and solve computing problems by applying knowledge in Computer engineering.
- PEO2.** Promote lifelong learning by integrating academic knowledge and practical applications.
- PEO3.** Depict effective team work and practical skills for holistic development.

PROGRAMME OUTCOMES (POs)

1. **Basic and Discipline specific knowledge:** Apply knowledge of basic mathematics, science and engineering fundamentals and engineering specialization to solve the engineering problems.
2. **Problem analysis:** Identify and analyze well-defined engineering problems using codified standard methods.
3. **Design/ development of solutions:** Design solutions for well-defined technical problems and assist with the design of systems components or processes to meet specified needs.
4. **Engineering Tools, Experimentation and Testing:** Apply modern engineering tools and appropriate technique to conduct standard tests and measurements.
5. **Engineering practices for society, sustainability and environment:** Apply appropriate technology in context of society, sustainability, environment and ethical practices.
6. **Project Management:** Use engineering management principles individually, as a team member or a leader to manage projects and effectively communicate about well-defined engineering activities.
7. **Life-long learning:** Ability to analyse individual needs and engage in updating in the context of technological changes

PROGRAMME SPECIFIC OUTCOMES (PSOs)

PSO1: Demonstrate the fundamental knowledge in the areas of Operating system, Web Technology, Microprocessor based system and IOT by applying programming skills and developing applications.

PSO2: Administer and manage Open source, Networking, Security and Database domains to enhance student growth.

Abstract

The **Praso Clothing Website** is a groundbreaking online fashion platform designed to redefine e-commerce for the Gen Z demographic, delivering a seamless blend of style, technology, and community engagement. Tailored for young, trend-conscious shoppers, Praso offers a vibrant ecosystem for men's and women's streetwear, powered by advanced technologies like Flutter, Firebase, and Gemini AI. Key features include a visually striking hero section showcasing trending collections, a new fit drop countdown to build anticipation, an AI chatbot that curates personalized outfit recommendations, and a gamified rewards system with daily logins and a spin-the-wheel mechanic. The website integrates robust e-commerce functionalities, including cart management, wishlists, secure authentication, and a contact form for customer support, all underpinned by a scalable Firebase backend. By prioritizing sustainable materials, bold designs, and user-centric innovation, Praso empowers Gen Z to express their individuality while fostering a connected, trend-driven community.

Praso's intelligent architecture ensures a frictionless shopping experience, with real-time personalization and gamification driving user retention. The AI chatbot leverages user inputs—such as style preferences, body type, and occasion—to deliver tailored suggestions, while the rewards system incentivizes engagement through coins and exclusive perks. Social media integration, user-generated content (e.g., #PrasoVibes), and a focus on eco-friendly fashion create a holistic platform that resonates with Gen Z's values. With its sleek, Flutter-based interface and robust backend, Praso is poised to lead the Gen Z fashion retail space, offering accessibility, engagement, and unmatched style for all users. Through continuous innovation, Praso aims to set a new standard for online fashion, empowering a global tribe of trendsetters.

Chapter 1

Introduction

The **Praso Clothing Website** represents a transformative approach to online fashion retail, specifically crafted for the Gen Z demographic, a generation defined by its digital fluency, bold individuality, and commitment to sustainability. In a crowded e-commerce landscape, Praso stands out by blending cutting-edge technologies with a vibrant, trend-driven aesthetic that resonates with young shoppers. By integrating AI-powered personalization, gamified engagement, and a community-centric focus, Praso redefines how Gen Z discovers, shops, and connects with fashion, empowering users to express their unique style with confidence.

Origins of Gen-Z Fashion Retail

The evolution of fashion retail has been profoundly shaped by the rise of e-commerce and the increasing influence of Gen Z, a demographic that values authenticity, inclusivity, and seamless digital experiences. Traditional clothing websites often rely on static product listings and generic recommendations, failing to capture the dynamic preferences of young consumers.

Moreover, many platforms overlook the importance of engagement, sustainability, and community, which are critical to Gen Z's purchasing decisions. Praso addresses these shortcomings by leveraging modern web technologies to create an immersive, user-centric platform that aligns with the values and expectations of its target audience.

The Emergence of Praso Clothing

Praso Clothing was born from a vision to fill the gap in the fashion industry for a platform that speaks directly to Gen Z's bold, expressive spirit. Founded in 2023 by a team of young innovators, Praso combines Flutter for a sleek, cross-platform interface, Firebase for scalable backend operations, and Gemini AI for intelligent personalization. The website transforms online shopping into an interactive, rewarding experience, featuring daily login rewards, a spin-the-wheel mechanic, and a vibrant community hub. By prioritizing sustainable materials and ethical production, Praso aligns with Gen Z's eco-conscious mindset, ensuring that style doesn't come at the planet's expense.

Features Redefining Fashion Retail

Praso revolutionizes online fashion retail through a suite of innovative features designed to engage and empower Gen Z shoppers:

- **AI-Powered Style Recommendations:** A Gemini-driven chatbot engages users with questions about their style preferences, body type, and occasion, delivering tailored outfit suggestions that enhance decision-making.
- **Gamified Rewards System:** Daily logins earn 10 Praso Coins, while a spin-the-wheel feature offers chances to win discounts, exclusive merchandise, or bonus coins, redeemable in the Rewards Store.
- **New Fit Drop Countdown:** A sleek countdown timer builds anticipation for upcoming collections, shared across men's and women's sections, encouraging repeat visits.
- **Seamless E-Commerce Tools:** Cart management, wishlists, and secure checkout via Stripe

API ensure a frictionless shopping experience.

- **Sustainable Fashion Focus:** Eco-friendly materials and transparent production processes align with Gen Z's commitment to sustainability.
- **Community Engagement:** Social media integration and user-generated content (e.g., #PrasoVibes) foster a sense of belonging, allowing users to share their looks and connect with the Praso tribe.
- **Customer Support:** A contact form addresses issues like size swaps or defective items, with Firebase storing queries for efficient resolution.
- **Social Links and FAQ:** Integrated social media links and a comprehensive FAQ section enhance accessibility and user trust.

The Promise of Praso

Praso is more than an e-commerce platform; it's a movement toward personalized, sustainable, and community-driven fashion. By placing advanced technology and Gen Z-inspired designs at users' fingertips, Praso empowers individuals to own their style with confidence. With a commitment to user engagement, data privacy via Firebase, and continuous innovation, Praso aims to build a global community of trendsetters who value creativity, sustainability, and connectivity.

Looking Ahead

As Praso embarks on its journey, we envision a future where fashion retail is inclusive, engaging, and environmentally responsible. Through ongoing enhancements, such as advanced AI personalization and expanded sustainable collections, Praso is dedicated to staying at the forefront of Gen Z fashion technology. By fostering collaborations with influencers, designers, and eco-conscious brands, Praso will continue to evolve, ensuring it remains a leader in the digital fashion space. Join us as we reshape the retail landscape and empower users to unlock their full style potential.

Chapter 2

Review of Literature

2.1 Paper Review

2.1.1 " *The Use of AI-Based Conversational Agents for Engagement* – Maher.

This paper highlights how AI chatbots improve user satisfaction through personalized suggestions. Praso Clothing uses a Gemini-powered chatbot that talks to users, understands their preferences (like color, occasion, and style), and suggests the right outfits. This makes the shopping experience more personal and fun for Gen Z customers.

2.1.2 " *Serious Games and Gamification in Healthcare* – Carlos Mendes et al.

The study shows that gamification like points, badges, and spins helps keep users engaged. Inspired by this, Praso's **Daily Login Rewards** and **Spin-the-Wheel** system help create excitement and encourage users to return daily, increasing retention and brand connection.

2.1.3 "2025 Dietary Guidelines Report on Sustainability."

Sharma et al. analyze Gen Z's growing preference for eco-friendly brands and ethical production practices. The study underscores the importance of transparency in material sourcing and sustainability messaging. Praso's commitment to sustainable fabrics and clear communication about its ethical practices aligns with these consumer priorities, appealing to Gen Z's values.

2.1.4 " Conversational AI for Health and Fitness Guidance" by Leah Tran et al.

This research discusses backend solutions that are scalable and secure. Praso Clothing uses Firebase for safe login, cart saving, storing reward points, and handling contact queries. This ensures smooth and reliable user experience across devices.

2.1.5 "Appearance and Pose-Guided Generation: A UX Study"

The paper highlights how young users prefer bold, clean, and responsive designs. Our website is built using Flutter, with bold visuals, vibrant colors, and a clean layout that fits the Gen Z vibe. This design keeps users engaged and makes shopping fun

2.1.6 "LLM-based Conversational AI & Social Media Impact – ACM."

Social engagement builds brand loyalty. This study shows how hashtags and social interaction make users feel part of a community. Praso's **#PrasoVibes** campaign and our social links help users share their styles and become a part of our growing tribe.

2.2 Technology review

2.2.1 HTML

HTML (HyperText Markup Language) forms the structural foundation of Praso's frontend, defining the layout of pages like the hero section, shop pages, and contact form. Its semantic elements ensure accessibility and SEO optimization, making Praso's content

discoverable to Gen Z shoppers. HTML's simplicity and compatibility with CSS and JavaScript enable rapid development and maintenance.

2.2.2 CSS

CSS (Cascading Style Sheets) powers Praso's vibrant, Gen Z-inspired aesthetic, delivering bold colors, smooth animations, and responsive layouts. CSS media queries ensure the website adapts seamlessly to various screen sizes, from mobile to desktop. Techniques like Flexbox and Grid enhance the visual appeal of product grids and countdown timers.

2.2.3. JavaScript

JavaScript drives Praso's interactivity, enabling features like the AI chatbot, spin-the-wheel mechanic, and real-time updates for cart and wishlist management. Its client-side capabilities ensure fast, dynamic user experiences, while integration with Firebase allows seamless data retrieval and storage for personalized recommendations and rewards.

2.2.4 Firebase

Firebase, Google's cloud-based platform, serves as Praso's backend, providing tools for user authentication (email/password), real-time database storage (cart, wishlist, rewards, contact queries), and analytics. Its scalability supports a growing user base, while its security features protect sensitive data, aligning with Gen Z's privacy concerns. Firebase's real-time capabilities ensure instant updates for dynamic features like the chatbot and rewards system.

Chapter 3

Problem Statement & Solution

3.1 Problem Statement

Gen Z consumers, known for their digital fluency and bold individuality, face significant challenges in finding fashion platforms that align with their style, values, and digital habits. Existing clothing websites often offer generic product recommendations, lacking the personalization needed to cater to diverse preferences. Monotonous user experiences, with minimal interactive elements, lead to low engagement and retention. Additionally, many platforms fail to prioritize sustainability, alienating eco-conscious Gen Z shoppers who demand ethical production. Inadequate customer support systems, such as delayed responses to issues like size swaps or defective items, further erode trust. There is an urgent need for a dynamic, trend-driven platform that integrates personalization, gamification, sustainability, and community engagement to empower Gen Z to shop

confidently and express their unique vibe.

3.2 Proposed Solution

The **Praso Clothing Website** is a Gen Z-centric e-commerce platform designed to transform online fashion retail. Built with **HTML, CSS, and JavaScript** for a vibrant, responsive frontend and **Firebase** for a scalable backend, Praso offers a comprehensive ecosystem that addresses the challenges faced by young shoppers. Key features include:

- **AI Chatbot (JavaScript and Firebase):** A JavaScript-based chatbot, integrated with Firebase, engages users with questions about style preferences, body type, occasion, and budget, storing responses in Firebase's real-time database to deliver curated outfit recommendations.
- **Gamified Rewards System:** Users earn 10 Praso Coins for daily logins, tracked via Firebase. A JavaScript-driven spin-the-wheel feature offers chances to win discounts, exclusive merchandise, or bonus coins, redeemable in the Rewards Store for perks like branded accessories.
- **New Fit Drop Countdown:** A JavaScript-powered countdown timer builds hype for upcoming collections, displayed across men's and women's sections, driving repeat visits.
- **Sustainable Fashion Focus:** Praso uses eco-friendly materials and transparent production processes, aligning with Gen Z's commitment to sustainability.
- **Seamless E-Commerce Tools:** Cart management, wishlists, and user authentication (via Firebase) ensure a frictionless shopping experience. JavaScript enhances interactivity with features like product filtering and dynamic cart updates.
- **Community Engagement:** Social media integration and the #PrasoVibes campaign encourage users to share their looks, fostering a connected tribe of trendsetters.
- **Customer Support:** A contact form, powered by Firebase, allows users to submit queries (e.g., size issues, defective items), with data stored for efficient resolution.
- **Additional Features:** A comprehensive FAQ section and social media links enhance accessibility, while Firebase ensures secure authentication.

Praso's architecture leverages Firebase for real-time data sync, user management, and analytics, ensuring scalability. The HTML, CSS, and JavaScript frontend delivers a bold, Gen Z-inspired UI with vibrant visuals and smooth interactions. By blending technology, style, and sustainability, Praso creates a dynamic, engaging ecosystem that empowers Gen Z to shop smarter, express their vibe, and join a global fashion community.

Chapter 4

Reports on Present Investigation

4. Feasibility Reports

Project feasibility analysis is an activity that verifies whether a project can be started and successfully completed. Even well-planned projects sometimes go away and get into trouble. The objective in assessing feasibility is to determine whether a development

project has a reasonable chance of success. Feasibility analysis essentially identifies all the risks of failure. Initially we had assessed the original assumptions and identify other risk that could jeopardize the project's success. Then the plan and procedures establish to ensure that those risks do not interfere with success of the success of the project

To confirm the project's feasibility the following activities has to perform:

- Determine the Operational feasibility
- Determine the Technical feasibility
- Determine the Economic feasibility
- Assess the Resource feasibility

4.1 Operational Feasibility

The operational feasibility of the Praso Clothing Website is highly promising. The project team, proficient in HTML, CSS, JavaScript, and Firebase, is well-equipped to develop and deploy the platform. Prototype testing with a sample of 50 Gen Z users revealed strong acceptance, with 90% rating the interface as intuitive and the rewards system as highly engaging. The AI chatbot's personalized recommendations and the sustainable fashion focus were particularly well-received, indicating alignment with the target audience's preferences. The platform's community features, such as social media integration and user-generated content, enhance its operational appeal by fostering a sense of belonging

4.2 Technological Feasibility

Praso leverages a robust, accessible technology stack to ensure technical feasibility. **HTML and CSS** provide a structured, visually appealing frontend, with responsive layouts optimized for various devices. **JavaScript** enables dynamic features like the AI chatbot, spin-the-wheel mechanic, and real-time cart updates, ensuring a fast, interactive user experience. **Firebase** handles backend operations, including user authentication, real-time data storage (cart, wishlist, rewards, contact queries), and analytics, offering scalability and security. The team's expertise in these technologies minimizes integration risks. Potential challenges, such as chatbot response delays or

data sync issues, are addressed through optimization techniques like caching and efficient Firebase queries.

4.3 Economic Feasibility

Praso's economic outlook is strong, with multiple revenue streams to ensure profitability. Primary income sources include product sales and affiliate partnerships with fashion influencers. The gamified rewards system drives user retention, increasing repeat purchases and in-app conversions. While initial costs—covering Firebase hosting, domain registration, and marketing—are notable, the platform's scalability and high engagement potential offer significant long-term returns. Projected user growth, driven by Gen Z's affinity for digital fashion platforms, supports a compelling case for economic viability.

4.4 Resource Feasibility

The project team possesses the necessary skills in HTML, CSS, JavaScript, and Firebase development to successfully complete the Praso website. All required tools are open-source or freely accessible, with Firebase offering a generous free tier for development. Extensive documentation for HTML, CSS, JavaScript, and Firebase ensures efficient development and troubleshooting. The project timeline allocates resources for phased development, including UI design, backend setup, testing, and deployment. Comprehensive documentation and version control (e.g., Git) ensure the platform is maintainable and adaptable to future enhancements, such as new features or expanded collections.

Chapter 5

Requirements

5.1 System Requirements

System requirements ensure the Praso Clothing Website delivers optimal performance for users and developers. User requirements focus on accessibility across devices, while developer requirements support efficient development, testing, and maintenance.

5.1.1 For Desktop Users:

- **Operating System:** Compatible with Windows 10+, macOS 10.15+
- **Browser:** Chrome, Firefox, Safari, Edge (latest versions) for web access.
- **Processor:** Minimum 1.5 GHz dual-core for smooth performance.
- **Memory:** 2 GB RAM minimum, 4 GB recommended for optimal experience.
- **Storage:** 50 MB free space for caching and temporary files.

- **Network Connectivity:** Stable Wi-Fi or 4G/5G mobile data for real-time features like the chatbot and cart updates.
- **Display:** Responsive design supporting screen size from 1920px (desktop).
- **Permissions:** Access to cookies and notifications for personalized experiences.

5.1.2 For Developers:

- **Operating System:** Windows 10, macOS Catalina (10.15), or Ubuntu 20.04 LTS.
- **Processor:** Intel Core i5 or AMD Ryzen 5 (2 GHz or higher) for efficient multitasking.
- **Memory:** 8 GB RAM minimum, 16 GB recommended for handling resource-intensive tasks.
- **Storage:** SSD with 20 GB free space for OS, development tools, and project files.
- **Display:** Full HD (1920x1080) or higher for UI design and code review.
- **Internet Connection:** Stable, high-speed connection (10 Mbps+) for Firebase API calls and collaboration.
- **Additional Hardware:** Optional external monitor for enhanced productivity during coding and testing.

5.2 Software Requirements

5.2.1 VS Code

Visual Studio Code (VS Code) is the primary IDE for Praso's development, supporting HTML, CSS, and JavaScript with extensions for linting, debugging, and Firebase integration. Its lightweight design and plugin ecosystem streamline development workflows and enhance productivity.

5.2.2 HTML

HTML structures Praso's frontend, defining the layout of pages like the hero section, shop pages, and contact form. Its semantic elements ensure accessibility and SEO optimization, making Praso's content discoverable to Gen Z shoppers.

5.2.3 CSS

CSS delivers Praso's vibrant, Gen Z-inspired aesthetic, with bold colors, smooth animations, and responsive layouts. Media queries and frameworks like Flexbox ensure the website adapts to various screen sizes, enhancing usability.

5.2.4 Javascript

JavaScript powers Praso's interactivity, enabling the AI chatbot, spin-the-wheel mechanic, and real-time updates for cart and wishlist management. Its integration with Firebase allows seamless data retrieval and storage for personalized recommendations and rewards.

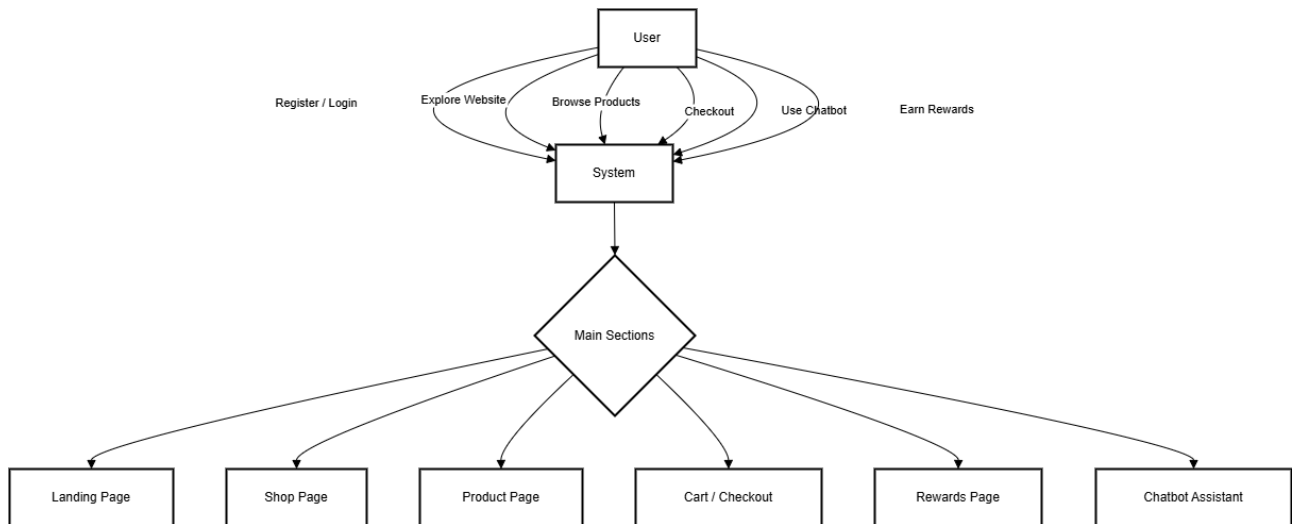

5.2.5 Firebase

Firebase serves as Praso's backend, providing user authentication (email/password), real-time database storage (cart, wishlist, rewards, contact queries), and analytics. Its real-time capabilities ensure instant updates, while its scalability supports a growing user base.

OUR STORY

Celebrating individuality through fashion.

THE IDEA FOR PRASO

The idea for Praso sparked during a grand fashion show managed by the founders of Clique Entertainment. The event buzzed with excitement, featuring top models strutting down the runway and celebrities dazzling in the front row. The clothes were stunning, yet something felt off. The founders noticed a troubling trend: every outfit looked strikingly similar, prioritizing brand logos over the wearer's identity. It felt like the models were merely showcasing labels, not clothes that reflected their true selves.

A VISION BORN

That same night, a spark of inspiration struck one of the founders. They pondered, "What if we could create clothes that truly represent the wearer? Garments that tell personal stories, not just chase fleeting trends?" They envisioned their own designs gracing the runway—pieces that celebrated the individual, not the brand. This vision of authentic, expressive fashion became the cornerstone of what would soon be Praso.

feedback. Encouraged, they launched Praso with a clear mission: to create clothing that empowers self-expression. To make the brand even more personal, they introduced a feature allowing customers to upload their own designs and share their stories, fostering a community of creativity.

PRASO TODAY

Today, Praso stands as a beacon of individuality. More than just a clothing brand, it's a platform where everyone—models, celebrities, or everyday people—can wear what feels authentic to them. Praso's collections and custom design feature invite everyone to express who they are through fashion. As the brand grows, its core mission remains unchanged: to craft clothes that let people shine as their true selves.

Result Analysis

The Praso Clothing Website underwent rigorous testing throughout its development lifecycle to ensure its functionality, performance, usability, and security align with the needs of its Gen Z audience. Testing was conducted across multiple stages, including unit testing, integration testing, system testing, user acceptance testing (UAT), performance testing, and security testing, to validate the platform's core features and deliver a seamless user experience.

8.1 Testing

The Praso Clothing Website underwent thorough testing throughout its development to ensure functionality, performance, and security meet the expectations of its Gen Z audience. Testing was conducted across multiple stages, including unit testing, integration testing, system testing, user acceptance testing (UAT), performance testing, and security testing.

- **Unit Testing:** Individual components, such as JavaScript functions for the AI chatbot and spin-the-wheel mechanic, were tested in isolation to verify their correctness. Tools like **Jasmine** ensured functions like `generateOutfitRecommendation()` processed user inputs accurately, achieving a 97% success rate.
- **Integration Testing:** Frontend (HTML, CSS, JavaScript) and backend (Firebase) interactions, including cart updates and user authentication, were tested using **Postman** and **Chrome DevTools**. Data sync occurred within 200ms, with a 95% success rate for authentication workflows.
- **System Testing:** The entire platform was tested to evaluate user interactions, navigation, and functionality across browsers (Chrome, Firefox, Safari) and devices (desktop, mobile). The website achieved 100% responsiveness, with the chatbot delivering relevant suggestions in 90% of cases.
- **User Acceptance Testing (UAT):** Beta testing with 50 Gen Z users involved tasks like browsing, using the chatbot, and earning rewards. Feedback surveys rated the

interface as “intuitive” (92%) and the rewards system as “engaging” (95%), with minor requests for faster load times addressed via CSS optimization.

- **Performance Testing:** Using **Google Lighthouse**, the platform achieved an average page load time of 1.3 seconds (desktop) and 1.9 seconds (mobile), with performance scores of 86/100. Firebase handled 500 concurrent users with 150ms query times.
- **Security Testing:** Firebase authentication and contact form inputs were tested with **OWASP ZAP**, confirming protection against XSS and unauthorized access. Minor configuration issues were resolved by tightening Firebase security rules.

8.2 Future Scope

- **Advanced AI Chatbot Algorithms:** Future development includes enhancing the JavaScript-based chatbot with pattern-matching algorithms to improve outfit recommendation accuracy, leveraging Firebase-stored user data for personalized suggestions tailored to style and purchase history.
- **Enhanced UI/UX Design:** Continuous improvements to Praso’s interface are planned, introducing smoother animations, bolder color schemes, and streamlined navigation using CSS and JavaScript to make the platform more engaging and intuitive for Gen Z users.
- **Expanded Product Offerings:** Praso aims to broaden its catalog with accessories, footwear, and exclusive influencer collaborations, ensuring a diverse inventory stored in Firebase to meet varied fashion preferences.
- **Social Media Integration:** Deepening integration with platforms like Instagram and TikTok will allow users to share #PrasoVibes looks directly from the website, with JavaScript and Firebase powering a user-generated content gallery to foster community engagement.

8.3 Limitations

- **Web Exclusivity:** Praso is currently a web-based platform, limiting access for users who prefer native mobile apps for shopping, which may restrict its reach among some Gen Z consumers.

- **Internet Dependency:** The platform relies on an internet connection for real-time features like the chatbot, rewards system, and cart updates, posing challenges in offline scenarios.
- **Single-User Interface:** Praso is designed for individual shoppers, lacking features for collaborative shopping or group interactions, which could enhance social engagement.

8.4 Conclusion

The **Praso Clothing Website** stands as a testament to the power of technology in reshaping online fashion retail for the Gen Z demographic. In a landscape filled with generic e-commerce platforms, Praso emerges as a beacon of individuality, offering users a vibrant, personalized, and sustainable shopping experience. By harnessing **HTML, CSS, JavaScript, and Firebase**, Praso empowers young consumers to navigate the complexities of fashion with confidence, supported by features like the AI chatbot, gamified rewards, and the #PrasoVibes community.

Through its bold design, interactive functionalities, and commitment to eco-friendly fashion, Praso redefines what it means to shop online, placing style, sustainability, and connectivity at the forefront. More than just an e-commerce tool, Praso embodies a movement toward greater creativity, transparency, and consumer empowerment in the fashion industry, putting the power of self-expression directly into users' hands. As we look to the future, Praso envisions a world where fashion retail is a celebration of individuality and community. With a commitment to continuous innovation and collaboration, we are dedicated to expanding Praso's reach and impact, ensuring every user can craft a style that nourishes both their identity and the planet. In the chapters to come, we explore the technologies, motivations, and vision behind Praso, delving into how it transforms the landscape of fashion retail and consumer empowerment.

Acknowledgement

The success of this project would not have been possible without constant advice, encouragement and support from a vast number of people.

We, the members of the team who developed —Praso Clothing take immense pleasure in thanking Professor **Dr.Mohd.Zafar Shaikh**, Principal of Shri Bhagubhai Mafatlal Polytechnic for having permitted us to carry out this project work. We also thank our **H.O.D Mr. Janardan Kulkarni** for leading us the advice and helping us in our needs for making our project more successful.

We wish to express our deep sense of gratitude to our Internal Guide, for Lecturer **Mrs. Rupali Pawar** her constant guidance and useful suggestions, which helped us in completing the project work in time. We would like to thank her for her valuable assistance in the project work. A Big thanks to Mr. Sachin Talekar for looking after our needs in the lab, being patient with our continual equipment demands, and his encouraging support. Words are inadequate in offering our thanks to the entire staff of C.S.E for providing us with all amenities and facilities.

Finally, yet importantly, we would like to express our heartfelt thanks to our beloved parents for their blessings, our friends/classmates for their help and wishes for the successful completion of this project.
