

PROJECT PRESENTATION

PRASO CLOTHING

A Modern Clothing Brand with Personalized Shopping Experience

Presented By:

Jay Patel – B031

Raj Patel – B032

In the Guidance Of:

Mrs. Rupali Pawar

MOTIVE OF THE PROJECT

PRASO was initially operating only through Instagram, where we helped design their T-shirt collections.

As their designs started gaining attention, the need to scale and reach a wider audience became clear.

WHAT WE LEARNED

In Semester 1, We built a static single-page website. It gave us a foundation in basic HTML, CSS, and layout structure.

- ☐ With this project, We moved a step ahead by:
 - Working in a team for the first time on a real brand
 - Understanding project management, task distribution & deadlines
 - Learning how to communicate and collaborate effectively
- ☐ We realized how different it feels to work on a live project that will actually be used by people.

WHAT WE LEARNED

Implemented multiple backend features like:

- **User Authentication**
- **Cart System with Context**
- **User Profile Handling**

- **Integrated animations and effects using Framer Motion & CSS**
- **Learned how to maintain code structure in a team project and manage version control**
- **Gained confidence in building real-world web apps beyond just static pages**

Task Managements

Backend

Backend Storage

Firebase

Features Of Praso Clothing

Home Page

Hero section, countdown, and AI chatbot.

Rewards & Contact

Daily bonuses, discounts, and responsive support.

Shop

Huge Product Catalog and designs to choose from.

About Us

Founders' story, reviews, and trust-building content.

Challenges We Faced

Design Balance

Blending vibrant aesthetics with usability required iteration.

User Engagement

Making rewards exciting but not overwhelming.

Time Pressure

Delivering features like cart and rewards under tight deadlines.

Technical Hurdles

AI chatbot integration and backend user storage.

Crafting and Code

1

UI Designing

- Figma and Adobe XD

2

Frontend

- HTML, CSS, and JavaScript for structure and style.

3

Backend

- Implemented Firebase for user and inventory management
- Payment gateway

Fits That Slay On Their

Future Scope

**Introduce AR try-on
features for virtual
fitting.**

**Expand product lines
and add exclusive
drops for loyal users**

**Enhance AI chatbot
with advanced styling
algorithms**

**Scale rewards with
tiered loyalty
programs and
community-driven
campaigns**

Conclusion

1.

The Praso journey was an amazing adventure that taught us to be creative, strong, and focused on our users.

2.

We learned how to work as a team, solve problems, and make things users love.

3.

We built a fun website that helps Gen Z show their unique style.

THANK YOU

:)
